CAUTION
ATENCIÓN

Please follow the instructions carefully as they have been designed to help you, don't skip any pages or stages as you may miss important steps. Use the correct tools and relevant protective clothing/eyeware. Gloves are essential as there may be some sharp edges. A pair of saw horses would be useful for the assembly.

Por favor, siga las instrucciones cuidadosamente ya que se hicieron para ayudarle, no se salte ninguna página o etapa, ya que puede perder pasos importantes. Utilice las herramientas correctas y la ropa/gafas de protección pertinentes. Los guantes son esenciales ya que puede haber algunos bordes afilados. Un par de caballetes serían útiles para el montaje.

The Rocket Pocket kit will adapt to almost any stud dimension **HOWEVER**, the stud immediately above the frame must be 2x4. You can add layers of drywall to this to then obtain the wall thickness you require. Bare in mind the jamb dimensions will change accordingly.

El kit Rocket Pocket se adaptará a casi cualquier dimensión de montantes, **SIN EMBARGO**, el montante inmediatamente superior a la estructura debe ser de 2x4. Se pueden añadir placas de yeso a esto para luego obtener el espesor de la pared que usted requiere. Tenga en cuenta que las dimensiones de las jambas cambiarán de consecuencia.

INSTALLING DOOR BRACKETS

INSTALACIÓN DE LOS SOPORTES DE LA PUERTA

INSTALLING REAR DOOR BUMPER

INSTALACIÓN DEL PARACHOQUES DE LA PUERTA TRASERA

Attach the rubber bumper to the back of the door using the supplied screw.

Coloque el parachoques de goma en la parte posterior de la puerta utilizando el tornillo suministrado.

A spacer between the rear of the door and the rubber bumper is needed to protrude the door from the pocket when fully open. We recommend this with flush pulls to prevent injuries.

Se necesita un espaciador entre la parte trasera de la puerta y el parachoques de goma para que la puerta sobresalga del sistema cuando esté completamente abierta. Recomendamos esto con manillas enrasadas para evitar lesiones.

INSTALLING DOOR PANEL

INSTALACIÓN DEL PANEL DE LA PUERTA

Install rear end of door first.
Insertar la parte trasera de la puerta.

Adjust door height to be 1/4" (7 mm) above the floor and lock into position by tightening the lock nut.

Ajuste la altura de la puerta a 1/4" (7 mm) sobre el suelo y bloquear en posición apretando la tuerca de seguridad.
